Stripping the world model on sparse-reward tasks: bimodal, non-converging returns
ball-in-cup (sparse catch reward)
episode return
evaluation episode
full WM (vanilla)
WM stripped
stripped: bimodal — catch (~980) or nothing (0), never consolidates
pendulum swing-up (underactuated)
environment steps (millions)
stripped: high-variance, frequent 0-collapses (bimodal across seeds)
